

Status of Sleepers Hill - Conclusions

1. The road was originally a private road – owned and maintained by the residents, no public right of way.
2. As it is a through road (and hence frequently used by the public) and we have never controlled access to the road, it is likely that a public right of way has been established over time. However, no formal claim to this effect has ever been made and hence the road is not included in the Official List of Public Rights of Way. Hence its current status of “undetermined” in terms of public right of way.
3. In summary, the road is now still owned and maintained by the residents but its highway status is undetermined. Given its highway status is unclear, I think we ie the residents, can maintain that we believe it is still
