Dear Tim,

## **SLEEPERS HILL, WINCHESTER – TRAFFIC CALMING FEASIBILITY STUDY**

Thank you for providing us with the opportunity to submit a fee estimate for this scheme. Our brief and cost estimate is set out below:

- Initial site visit to discuss scope of the works.
- Carry out visual condition survey of the locations for traffic calming features.
- Produce Feasibility Report for Traffic Calming features.
- Produce Feasibility sketches to accompany report.
- Produce Feasibility Works Cost Estimate.

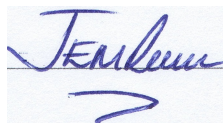

Our fee for undertaking the above will be £1920.00 + VAT

We would strongly recommend the installation of an Automatic Traffic Counter (ATC) for 1 week to collect a comprehensive set of speed data. I can pass the contact details to you for you to arrange this separately or alternatively we could also arrange this for you for an additional fee of £295.00 + VAT

Should the Feasibility Design and the Works Costs meet with your approval, we would offer taking the scheme through Detailed Design and potentially the Construction Phase.

I trust the attached is acceptable to you however, if you require any additional information please do not hesitate to contact the undersigned.

Yours sincerely,

**J E M Rennie**  
**for RPF Associates Limited**
